

Smart Contract Audit

FOR

Price Tools

DATED: 25 FEB 23'

AUDIT SUMMARY

Project name - Price Tools

Date: 25 February, 2023

Scope of Audit- Audit Ace was consulted to conduct the smart contract audit of the solidity source codes.

Audit Status: Passed (Contract is developed by pinksale's Safu Dev)

Issues Found

Status	Critical	High	Medium	Low	Suggestion
Open	0	0	0	0	2
Acknowledged	0	0	0	0	0
Resolved	0	0	0	0	0

USED TOOLS

Tools:

1- Manual Review:

a line by line code review has been performed by audit ace team.

2- BSC Test Network:

all tests were done on BSC Test network, each test has its transaction has attached to it.

3- Slither: Static Analysis

Testnet Link: all tests were done using this contract, tests are done on BSC Testnet

https://testnet.bscscan.com/token/0xAc23921dF369 474B409e0f5DAB39b71cbEc2A267

Token Information

Token Name: Price Tools

Token Symbol: PTOOLS

Decimals: 18

Token Supply: 1,000,000,000

Token Address:

0x92400f8B8C4658153c10c98500B63aC9F87571c2

Checksum:

adeaf35f858118ef35b1dc566ee56096f8c938d8

Owner:

0xfdd8434e6701c85c9794ab8b78276c3981f256f5

TOKEN OVERVIEW

Fees:

Buy Fees: 0%

Sell Fees: 0%

Transfer Fees: 0%

Fees Privilige: None

Ownership: Owned

Minting: No mint function

Max Tx Amount/ Max Wallet Amount: No

Blacklist: No

Other Priviliges: None

AUDIT METHODOLOGY

The auditing process will follow a routine as special considerations by Auditace:

- Review of the specifications, sources, and instructions provided to Auditace to make sure the contract logic meets the intentions of the client without exposing the user's funds to risk.
- Manual review of the entire codebase by our experts, which is the process of reading source code line-byline in an attempt to identify potential vulnerabilities.
- Specification comparison is the process of checking whether the code does what the specifications, sources, and instructions provided to Auditace describe.
- Test coverage analysis determines whether the test cases are covering the code and how much code isexercised when we run the test cases.
- Symbolic execution is analysing a program to determine what inputs cause each part of a program to execute.
- Reviewing the codebase to improve maintainability, security, and control based on the established industry and academic practices.

VULNERABILITY CHECKLIST

CLASSIFICATION OF RISK

Severity

- Critical
- High-Risk
- Medium-Risk
- Low-Risk
- Gas Optimization
 /Suggestion

Description

These vulnerabilities could be exploited easily and can lead to asset loss, data loss, asset, or data manipulation. They should be fixed right away.

A vulnerability that affects the desired outcome when using a contract, or provides the opportunity to use a contract in an unintended way.

A vulnerability that could affect the desired outcome of executing the contract in a specific scenario.

A vulnerability that does not have a significant impact on possible scenarios for the use of the contract and is probably subjective.

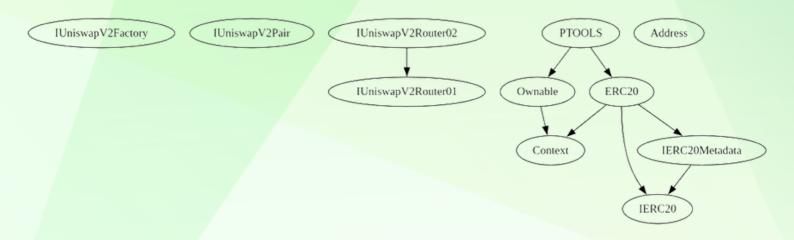

A vulnerability that has an informational character but is not affecting any of the code.

Findings

Severity	Found
◆ Critical	0
♦ High-Risk	0
◆ Medium-Risk	0
♦ Low-Risk	0
Gas Optimization /Suggestions	2

INHERITANCE TREE

POINTS TO NOTE

- Owner is not able to set buy/sell/transfer taxes (0% static)
- Owner is not able to blacklist an arbitrary wallet
- Owner is not able to set max buy/sell/transfer amounts
- Owner is not able to disable trades
- Owner is not able to mint new tokens

Result => A static analysis of contract's source code has been performed using slither,

No major issues were found in the output

FUNCTIONAL TESTING

Router (PCS V2):

0xD99D1c33F9fC3444f8101754aBC46c52416550D1

1- Adding Liquidity (Passed):

liquidity added on Pancakeswap V2:

https://testnet.bscscan.com/tx/0x39629581bec94c57e89bd1e1bbf 718d95eedefdae30d62a0da506bca52453fa3

no issue were found on adding liquidity.

2- Buying (0% Tax) (Passed):

https://testnet.bscscan.com/tx/0xa3ff4ddc9dd2a0d3161f13dfe107a077ac23e4b1aae207b91265d0338731ab88

3- Selling (0% Tax) (Passed):

https://testnet.bscscan.com/tx/0x23eeac4c9d3b6f224e91a8fa78d 81340cfcd1e8dc612d091b6badb68538006764

4-Transferring (0% tax)(Passed):

https://testnet.bscscan.com/tx/0xbeca595119bf35e1e6d97be448d a82208d10dd1462ba0bfc80eff9b41c9766f285

MANUAL TESTING SUGGESTIONS AND OPTIMIZATIONS

1- The contract contains a function named "excludeFromFees," despite the fact that there are no fees associated with the contract. This may cause confusion for investors of the contract. Same thing applies for "isExcludedFromFees" function.

Suggestion: One possible solution to address the confusion caused by the "excludeFromFees" function is to change its name to "setWhitelistedWallet" and to add a new function called "isWhitelisted." This would make the purpose of the functions clearer and more intuitive for users, as it would clearly indicate that these functions are related to whitelisting wallets rather than fees.

MANUAL TESTING SUGGESTIONS AND OPTIMIZATIONS

2) The 'claimStuckTokens' function in the contract prevents withdrawal of native tokens, even though there are no fees associated with the contract. Since withdrawing these tokens would not harm investors, it is recommended that the function be updated to allow for withdrawal of native tokens from the contract.

ABOUT AUDITACE

We specializes in providing thorough and reliable audits for Web3 projects. With a team of experienced professionals, we use cutting-edge technology and rigorous methodologies to evaluate the security and integrity of blockchain systems. We are committed to helping our clients ensure the safety and transparency of their digital assets and transactions.
